

## What's New and FAQs

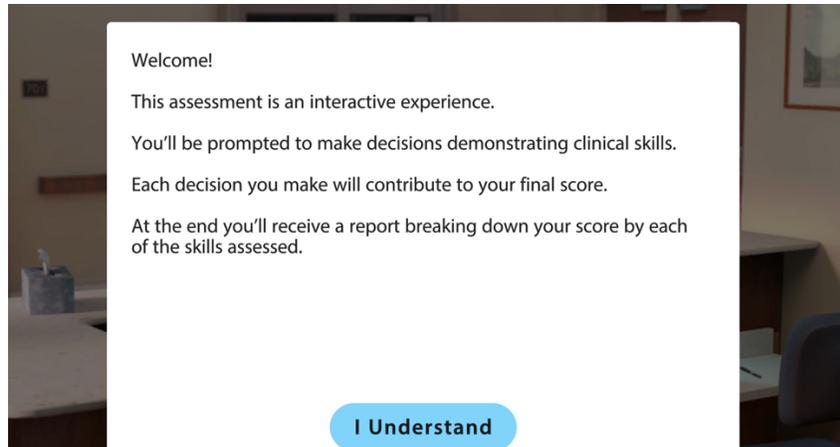

### MA SkillsBuilder™: Clinical & MA SkillsBuilder™: Clinical Plus

A number of enhancements have been made to MA SkillsBuilder™: Clinical & MA SkillsBuilder™: Clinical Plus products that will improve all active courses and learners in progress. **No new content updates have been made to these products.**

- **SIMS Quiz Introduction & Expectations:**
  - Guided instruction within the module to explain how incorrect answer selections will impact the user's simulation grade.
  - Users will no longer be directed to restart the quiz if an incorrect critical pitfall answer was chosen.
- **SIMS Quiz Images:** Improved images and image quality to enhance the user experience and help with answer selection.
- **Answer Keys:** Ensuring consistency between the simulation quiz questions and answers.

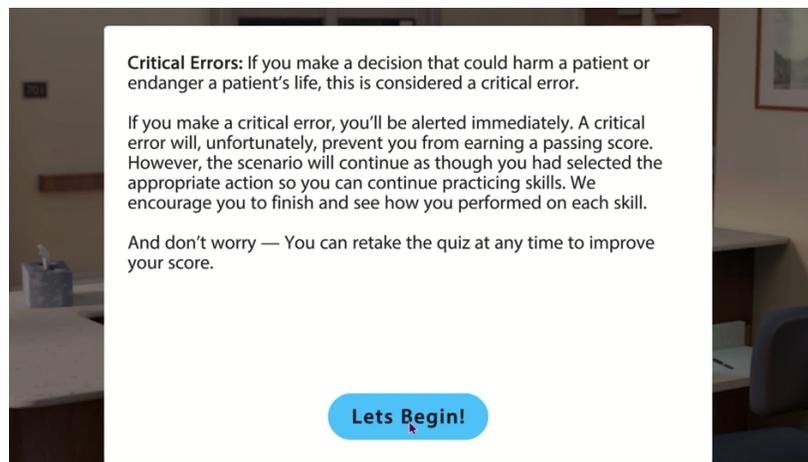

## SIMS Quiz Introduction & Expectations

Users will receive an overview of the quiz experience and how incorrect answer selections will impact the simulation grade, and will need to select “I Understand” before proceeding.

Additionally, users will no longer be directed to restart the quiz if an incorrect answer that is classified as a critical error—likely to result in a patient injury—was chosen. Before beginning the quiz, users are made aware of the resulting actions if a critical error answer is selected:

- They will be notified immediately that the answer they selected was a critical error.
- The error will result in a non-passing score for the quiz, but the scenario will continue so users can continue practicing the skills learned in the module. The quiz may be retaken at any time to receive a passing score.

## SIMS Quiz Images

SIMS quizzes in the MA SkillsBuilder™: Clinical/Clinical Plus products have been updated with improved images and image quality to enhance the user experience and help with answer selection.

## SIMS Quiz Reporting in Product

Learner Scoring Reports are found at the completion of each SIMS quiz. Refer to the scoring legend and sample report below.

Overall Result

Needs Improvement

You did not accurately perform minor surgical tasks for Alistair Burton, Kate Pope, or Juan Hammond.

Below is a breakdown of whether you performed each task correctly or incorrectly. If you performed a task incorrectly, the dashboard will use "Pitfall Categories" to show how severely the mistake impacts patient outcomes.

---

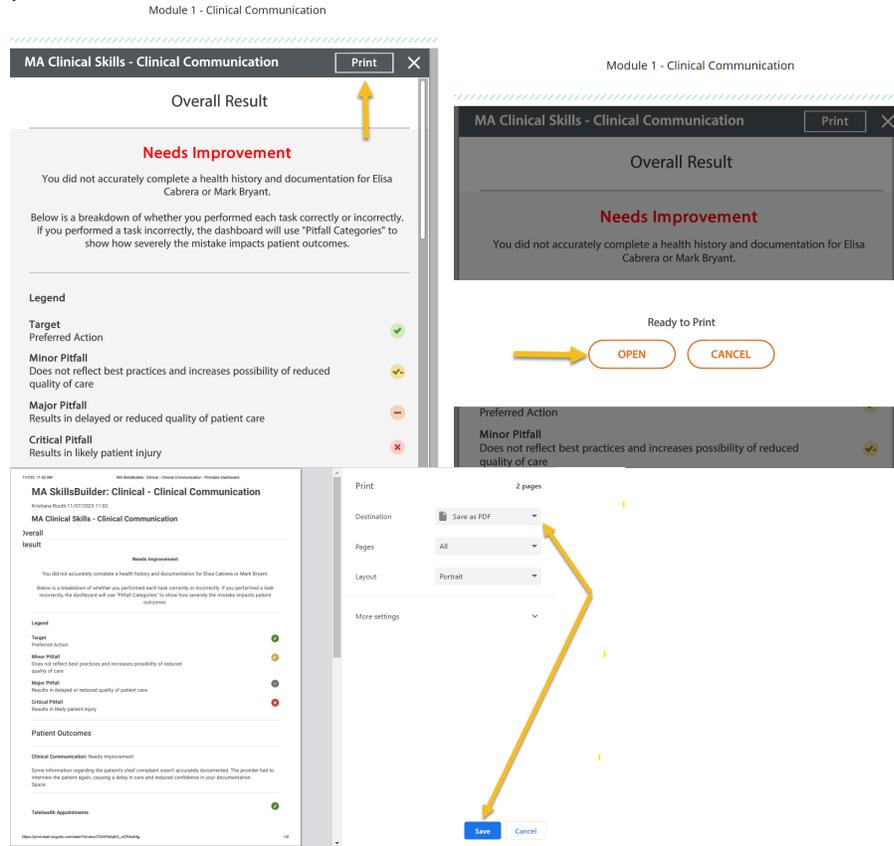

**Legend**

<b>Target</b> Preferred Action	✔
<b>Minor Pitfall</b> Does not reflect best practices and increases possibility of reduced quality of care	✔✖
<b>Major Pitfall</b> Results in delayed or reduced quality of patient care	✖

---

Cleanse the Incision Line	✔
Place Dressing on Wound and Wrap Bandage Around Dressing	✔
Provide Home Care Instructions	✔
<b>Suture Removal</b>	
Assemble Equipment	✔
Inspect the Wound and Sutures	✔
Remove Every Other Suture	✔
Work Scissors Under Knot and Cut the Suture	✔
Pull the Suture Toward the Wound	✖
Count and Dispose of Sutures	✖

The learner can share their Scoring Report with their facilitator by saving the report as a PDF file and sharing the file. To do this, learners can click on the print button, save the document as a PDF, and send it to their facilitator.

Some modules utilize branching questions—if a learner answers this first question correctly, the quiz will continue to the next question. However, if the learner selects the incorrect answer the quiz report will result in “Needs Improvement”.

## Answer Keys

Updates have been made to answer keys for instructors/facilitators to ensure consistency between the simulation quiz questions and available answers. The answer keys are located in the Facilitator Toolkit—please connect with your NHA representative if you need access to these links.
